

PRESS RELEASE 02/08

Hockenheim, 04/08/2008

SUCCESSFUL START FOR „BEST OF BIKE-TUNING 2008“

From Friday 4th to Sunday 6th of April Germany's best tuning motorcycles have been presented in the course of the 6th Motodays on the racetrack of Oschersleben/Germany for the ultimate showdown of VDMT's first event called [„BEST OF BIKE-TUNING 2008“](#). This was an outstanding occasion for more than 20 motorcycle journalists not only to study the technique of Germany's fastest motorcycles in detail but to ride them on the track as well.

At VDMT's (German Motorcycle Tuner Association) first event of this kind, the weather played the decisive role. On Saturday, heavy rain prevented from riding the bikes, but a sunny Sunday offered the journalists chances to get riding impressions of the bikes.

VDMT's services for journalists now offer free photographs and technical specifications of the motorcycles. Full technical reports can be delivered on request.
